SUPPLEMENT TO REPORT NO. 25X1X

1. Since 16 March 1948, large scale dismantling has been carried out with great speed at the cable and transformer plants of the Oberspreewerk. The entire transmission installations have already been removed from workshop IV.
2. In this connection it is mentioned that expropriated plants in the Soviet sector of Berlin which are under trusteeship are not permitted anymore to install permanent fixtures; e.g., the Soviet control officer at Wendenschloss in Miggelheim lately definitely disapproves applications for needed transfer of cables, installation of airconditioning systems, etc. On the other hand, the purchase of new removable machinery, such as business machines, typewriters, etc., is being freely granted.
